

Reconciliation of Non-GAAP Financial Measures and Regulation G Disclosures

To supplement our condensed consolidated financial statements presented in accordance with accounting principles generally accepted in the United States (GAAP), we provide additional measures of segments' operating income (loss), non-operating income (loss); cost of product sales and services; engineering, selling and administrative expenses; income before income taxes and minority interest; income taxes; minority interest; net income, and net income per diluted share adjusted to exclude certain costs, expenses, gains and losses. Harris management believes that these non-GAAP financial measures, when considered together with the GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period. Harris management also believes that these non-GAAP financial measures enhance the ability of investors to analyze Harris' business trends and to understand Harris performance. In addition, Harris may utilize non-GAAP financial measures as a guide in its forecasting, budgeting, and long-term planning process and to measure operating performance for some management compensation purposes. Any analysis of non-GAAP financial measures should be used only in conjunction with results presented in accordance with GAAP. A reconciliation of these non-GAAP financial measures with the most directly comparable financial measures calculated in accordance with GAAP follows:
